

LISTING OF CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1 – 30 (Canceled)

Claim 31. (New) A method of providing for play back by multimedia devices audio and video streams of data comprising the steps of:

providing at least one audio and video stream of data, stored at a least one server location, wherein said at least one audio and video stream is stored on a random access mass storage device associated with said at least one server, and wherein any given stored audio and video stream so stored is individually retrievable from the random access mass storage device associated with said at least one server;

providing to at least one of said multimedia devices a selection list, wherein said selection list comprises a selectable list of a plurality of pre-stored multiple audio and video streams stored on said at least one server;

providing a user controllable signal to server to select among the so listed multiple audio and video streams;

transmitting to said at least one multimedia device a selection for play back at least one of said stored audio and video streams of data stored in said mass storage device associated with said at least one server, in response to the user controllable signal.

Claim 32. (New) A method as in claim 31 wherein said selected audio and video stream is received by said at least one multimedia device and is stored locally on a random access mass storage device associated with said at least one multimedia device prior to play back of said selected audio and video stream.

Claim 33. (New) A method as in claim 32 wherein said stored audio and video stream is received by said at least one multimedia device and is stored locally on a random access mass storage device associated with said at least one multimedia device simultaneous with the play back of said selected audio and video stream.

Claim 34. (New) A method as in claim 31 wherein said random access mass storage device is a computer hard disk drive.

Claim 35. (New) A method as in claim 33 wherein said random access mass storage device is a computer hard disk drive.
